

test-document

A test document for smoke testing

Heading One

This is a paragraph with some text. It should be wrapped properly using Pretext's Canvas-based typography measurement engine. The line breaks should be computed from actual font metrics, not crude character-count heuristics.

Code Example

```
function greet(name: string): string {  
  return `Hello, ${name}!`;  
}
```

A Table

Feature	Status
Markdown	Working
Code	Working
Tables	Working

This is a blockquote. It should be indented with a left border.

- Item one
- Item two
- Item three
